We need everyone to understand the importance of being muted so that background noise is not disruptive. If you dialed in by phone, use your phone's 'Mute' button if you have one. If you do not have a mute button, use your phone keypad: *6 – to mute or unmute yourself

If you are interested in learning more - a full list of commands is available to you by using your phone keypad and pressing *4 to hear those commands. For a brief tutorial, you can visit:
